Title: Hella Ingredients Meal Generator
Who: Leah Rogers, Liam Slyne, Robert Renecker, Jia Lin
Project Tracker: https://trello.com/b/ik2tN7ER/project-plan

Repository: https://github.com/robertrenecker/iGotHellaIngredients

Deployment: To run the final version of our website, simply download the files from the github repository, and open the index2.html file which is located in the newfiles folder.

Documentation: we used primarily html and jquery so we didn't use an auto documentation tool because html is already well documented. We did self-document all the jquery functions that we wrote
